Rethink Modernization

June 1st Wednesday 3:30pm-5:30pm

Prepared by:
Gus Delgado, Solutions Architect – Open Legacy
Mark Schroeder, CM First

Agenda

- Two hour Workshop on the OpenLegacy IDE to show 5250 RPG Screen conversions and other capabilities of the platform.

Prerequisites

- Download JDK 1.7 or 1.8
- Install the IDE executable
Windows 32bit or 64 bit
- Download and Run Modeler
 - Identify Business Process Flow and screens related to the process flow
 - Capture screens and generate a .trail file
 - This .trail file will be used during the Workshop to do the implementation, build and deployment of a web/mobile solution.

Goals for the Workshop

- Overview of OpenLegacy.
- Software Installation
 - Run OpenLegacy Modeler to capture screens.
- Hands on experience with the IDE tool
 - Show ease of use, and answer any questions.
- Complete Implementation of a WebMobile/REST solution
 - Running in the OpenLegacy IDE based on a .trail file
- Successful deployment of the app.
 - Deploy on the Tomcat application server running within the IDE

The Workshop will be divided into 2 parts

- 1st Hour
 - Open Legacy introduction with architecture and IDE walkthrough
 - Show screen capturing with Open Legacy modeler
 - Show 5250 screen demo with Open Legacy screens
- 2nd Hour
 - Review .trail file generated during workshop
 - Implementation, build and deployment of a web/mobile solution
 - Q/A

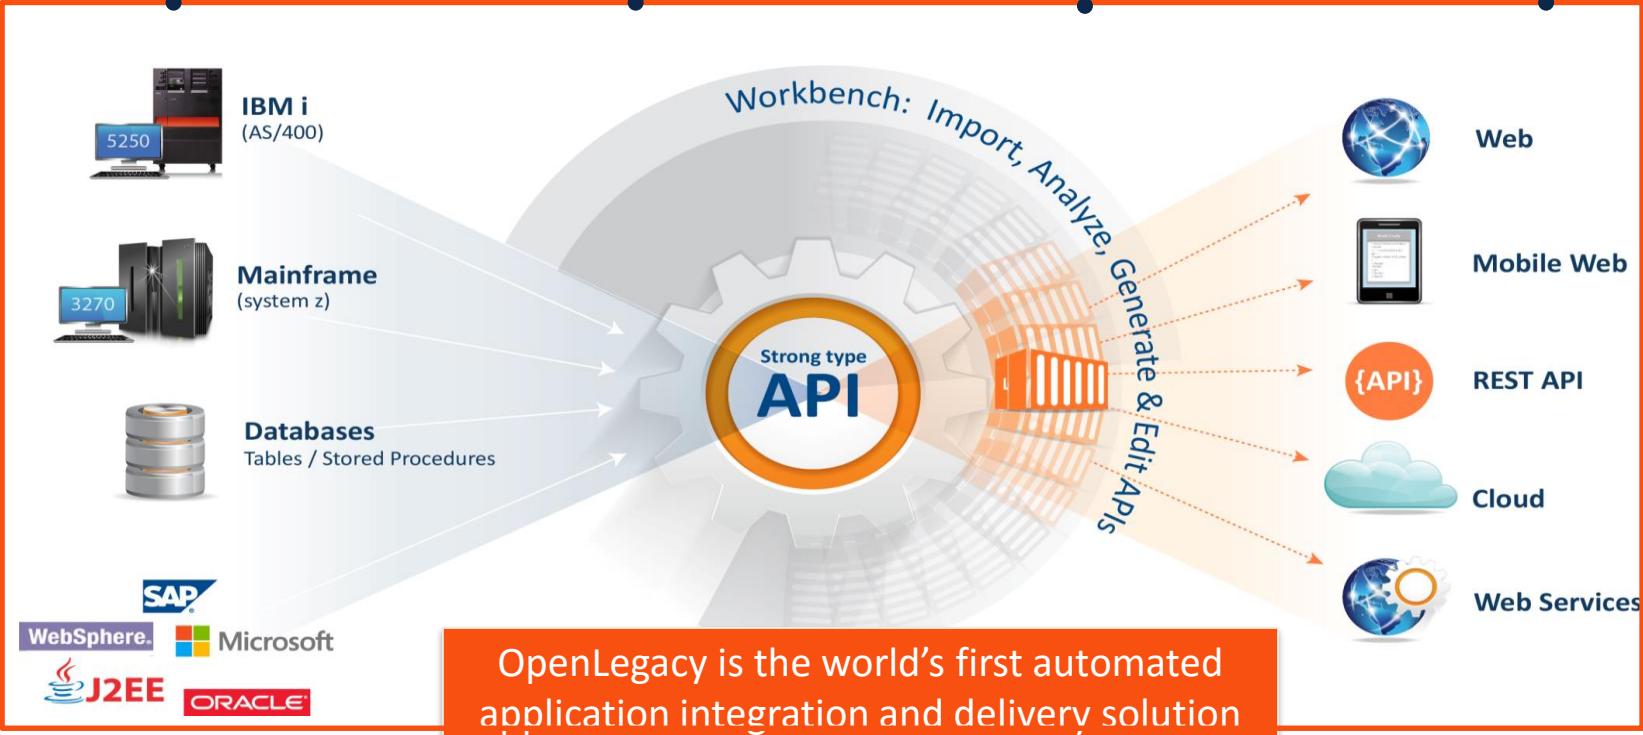

How it Works: Streamlined Automation

Automatic data structure analyzing

Streamlined convention based API generation

Out of the box security, load balancing and management

One click cloud, hybrid or on-premise deployment

OpenLegacy is the world's first automated application integration and delivery solution

OpenLegacy makes it easy and fast

IN DAYS INSTEAD OF MONTHS

Benefits

Rapid Days instead of months	Risk Free No changes to existing applications	Out of the Box content-aware Security and API management	Workload/ MIPS Reduction ("Deep caching")	Effortless Scalability automatically deploys to Docker cloud containers	Leverages existing assets: presentation, business, data or service	Fully customizable, rule based, completely open standards
